A. B. Weeks, Vancouver
Nels Nelson, New Westminster

The object of the Association is to further the interests of manufacturers and industries in British Columbia in all respects, and the record of the Association stands as a proof of its utility.

The persistent efforts of the Association in the direction of securing better recognition of the products of local industries have been met with considerable success, and today it stands as an accepted rule with regard to government, municipal, and other public work of any kind, that British Columbia material shall be given preferential treatment, and the majority of tenders call for local material if obtainable.

The Association has been the means of securing a large amount of work for British Columbia manufacturers which would otherwise have been sent out of the province by private interests, and has spent large sums and effort in educating the public in general to give preference to the products of the industries of their own province. It is estimated that the Association has been the means of procuring for and retaining within the province contracts, government orders, etc., to the extent of twenty-five million dollars, and was instrumental in inaugurating the shipbuilding industry.

Active committees deal with matters of freight, tariff and kindred subjects of importance to industry, and all matters of individual or collective interest to manufacturers.

The executive expenses are small, the services of members acting on the executive being rendered gratis.

Every manufacturer in the province not claiming membership in this Association is acting detrimentally to his own interest and is a source of weakness to the other provincial industries. The Association therefore urges every provincial manufacturer to become a member, which will be to his benefit and assist the co-operative effort for the benefit of the province as a whole.

Further information as to membership fees, etc., may be obtained from

It costs you nothing to mention you saw it in "Wrigley's B. C. Directory." It may mean another friend for us.

Vernon

the centre of the largest fruit growing and farming locality in British Columbia, was incorporated in 1898, and occupies a central position in the Okanagan Valley, being virtually the terminus of the Okanagan rail line of the C.P.R., 46 miles south of Sicamous, on the main line, and connecting through Okanagan Landing, 4 miles south, with the Okanagan Lake points in Southern Okanagan, and is 382 miles east of Vancouver. It has the offices of Provincial Government Agent; Assistant Horticulturist, Provincial Agriculture Department; Land Commissioner, Osoyoos Land Recording District; Provincial Police Chief Constable; Gold Commissioner, Vernon Mining Division; Sub-recorded Greenwood and Arrow Lakes Mining Division; Agent Dominion Department of Indian Affairs, Okanagan District; Deputy Collector Inland Revenue (Canada); Sub-Collector of Customs, out port of Revelstoke; and District Registrar of the Supreme and County Courts. The city enjoys all modern conveniences. Has Anglican, Presbyterian, Methodist and R. C. churches, public and high schools, C.P.R. and Govt. telegraphs. Fruit growing, packing, canning and evaporating are the principal industries. It is the largest city in and the distributing point for the Okanagan district.

As regards marketing and shipping facilities Vernon is exceptionally well favored. The district is served at present by the C.P.R., which connects it with the Prairie Provinces which afford a ready market for agricultural products of all kinds. Now that the war is over the export of apples to Great Britain, Australia and other countries will no doubt be resumed in ever-increasing volume. Owing to the great increase in production, the Canadian National Railways Board has decided to at once proceed with the construction of the Canadian Northern Railway through the district, connecting up with the main line at Kamloops; this will again expand the already large market for local products.

Vernon and district are well served as regards shipping concerns. Several important fruit and produce shipping houses have their headquarters in this city, and in Vernon is also centred the selling agency which handles the output of the various co-operative organizations of the valley.

A feature of the year's activities of the co-operative organization has been the formation of a subsidiary storage company among its members, and the mammoth frost-proof warehouse being erected by this company is now nearing completion. It is the largest building of the kind in the West, being 400 by 80 feet in size, with a frost-proof basement and first storey capable of storing about 250 cars of apples.

Mixed farming is very profitable in the Okanagan, and in the Vernon district a large acreage of suitable lands is available for this purpose. On the north side of Vernon the

709 Georgia St. Vancouver, B. C.

Land and Agricultural Co. of Canada have an estate of 17,000 acres. The soil is the very best.

Eight thousand acres of this are irrigated, 600 acres in orchard, 9,000 acres of range land, and 800 acres in hay, mostly alfalfa.

The company have at the present time 1,000 head of cattle.

The land is operated to show results that can be obtained and settlers will have the advantage of this experience.

It is a well established fact that stock ranching in the Okanagan and adjacent valleys is considered one of the most profitable undertakings, as frequently all classes of stock can feed on the open range from March till December.

A Crop of Alfalfa Near Vernon.

The climate is admirably suited for outside feeding through the few winter weeks that feeding is necessary.

From Vernon, up to the end of November, there have been shipped 491 cars of fruit, 456 mixed cars, 225 of vegetables, 16 of hay and 39 of livestock, making a total of 1,127 cars, valued at $1,127,000. Express shipments came to 18,310 packages, valued at approximately $27,465. The Graham evaporator has purchased from local farmers during the season, 3,000 tons of potatoes at an average price of $22 per ton, making a value of $66,000. The Dominion canners have bought locally, fruit, tomatoes and vegetables to the amount of $22,000. The vinegar works have purchased culls and other apples running to a value of $7,800.

District Superintendent McNabb, of the C.P.R., furnishes the information that from the first of June to the end of November a total of 2,769 cars of fruit and vegetables was taken out of the Okanagan by the C.P.R., and during the same period 217,500 packages of express, aggregating 5,437,000 pounds, were shipped. Express shipments this season increased by 50 per cent. over those of last year.

The Department of Agriculture of British Columbia have established here a branch, whose officers are always at the service of the grower to give assistance with advice regarding cultural methods, control of pests, and other problems with which the grower may have to contend in the growing of agricultural and horticultural products. This service also is effective in curtailing and controlling orchard pests, thus insuring perfect fruit.

The Vernon district offers great attractions to the hunter and fisherman. There is an abundance of feathered game, including many varieties of grouse, prairie chickens, ducks, geese, partridges, etc., within easy access of Vernon. The more mountainous districts offer various species of large game, among which are deer, caribou, moose, mountain goat, bear and mountain lion.

In both Kalamalka and Okanagan Lakes trout and other fish abound, and in the mountain streams and lakes the speckled beauties give the angler every opportunity to indulge in this pleasant and healthy pastime.

Population, 4,000.

Victoria

Victoria has the distinction of being the oldest community on the Northern Pacific Coast of this continent. Its history properly begins with the arrival of the steamship Beaver at Camosun Bay on the 13th of March, 1843, for the Hudson Bay Co. had decided to move its principal station from Fort Vancouver on the Columbia to Vancouver Island on account of the difficulties arising out of the international boundary question. The expedition to establish the new headquarters was headed by Factor (later Sir James) Douglas.

After the settlement of the boundary dispute merchantmen and war vessels commenced to call at Victoria to replenish their stores. Here, too, came the miners of '49 on their way to and from the gold fields of California to make purchases in exchange for their gold dust, for the Hudson's Bay Co. had a much better orangized service than any to be found along the American sea coast.

It was after the appointment of Sir James Douglas to the post of governor of Vancouver Island that the political and legislative history of Victoria began. In 1858 gold was discovered on the Fraser and Thompson Rivers. This period is marked by what is familiarly known as the Cariboo strike. At that time Victoria had a population of 5,000, and in 1862 the city was incorporated.

With the gold rush of 1898 to the Klondike, Victoria, in common with all of the cities on the Pacific seaboard from San Francisco to Prince Rupert, received a new trade impetus. About this time, too, tourist travel began to include Victoria in its itinerary, as the C.P.R., realizing the future possibilities of Vancouver Island, inaugurated a new steamship service between the cities of B.C. and Puget Sound ports, and established a chain of palatial hotels from the east of Canada to the west. Until 1914 when the war broke out Victoria came more and more into prominence as a commercial and residential city, an ocean port and a tourist resort.

In every way it is a modern city. It owns its own waterworks system, that of Sooke Lake furnishing a supply sufficient for a population of 500,000.

Victoria has 47 miles of paved streets; 120 miles of sidewalks and 60 miles of boulevards. It owns its own sewerage system, which cost over $2,000,000 to install. It has a population of 60,000. Its area is 4,637 acres, and the municipal assessment is $56,694,922 on land, and $26,196,630 on buildings.

Portion of the Inner Harbor.

The trade returns for the twelve months ending in March, 1918, were: Imports, $6,714,324; exports, $4,690,703; customs collections, $1,170,786; inland revenue, $158,329; bank clearings, $88,390,038.

Scores of the most modern offices and other business buildings have been erected; there are hundreds of beautiful homes; the entire downtown business district has been fitted with ornamental light standards; there is a very efficient street car service, operated by the B. C. Electric Railway Co., which also controls the domestic electric lighting and supplies power to factories. The ample supply of good water, the excellent system of sewerage, surface drains, street-cleaning, garbage collecting and disposal is reflected in the citizens' general good health and low death rate.

During the war period Victoria

ributed over 8,000 men for over-eas service, and $400,000 to the patriotic fund, and $650,000 to the Red Cross, as well as oversubscribing by 50 per cent. to both of the victory loans. She contributed largely to the manufacture of munitions and war materials, among which latter must be mentioned the aeroplane spruce which came from timber districts adjacent to the city, and which assisted so largely in establishing British air supremacy.

During and since the war, shipbuilding has been engaged in on a large scale. There are three shipyards now in operation on the waters of the inner harbor, formerly the Songhees Reserve, which is now owned by the government, and being utilized by them for industrial purposes and as railway terminals. These yards are the Foundation Co., Ltd., which is building wooden ships for the French Government; the Cholberg shipyards, which turn out vessels for Norwegian companies, and the Harbor Marine yards, which have the contract to build steel ships for the Dominion Government. Besides these there are the large ship-repairing plants of Yarrows, Ltd., and the Victoria Machinery Depot, as well as the local firm of Hutchison Bros. which manufacture metal fittings for ships.

Building operations interrupted by the war have been resumed. With the return of the men from overseas, normal conditions are becoming established; there is a demand for homes and farm lands, and great increase in all lines of commercial activity. A branch of the Aerial League of Canada has been established here. Flights have been made from Victoria to different cities on the Georgian circuit, and the development of an aerial mail and passenger service between Victoria Island and the mainland is looked forward to in the near future.

The Best Farming in British Columbia

FRANK SPENCER

Vernon, B.C.

One of Victoria's chief attractions and perhaps her best advertisement from a climatic point of view is the Dominion Government Observatory, situated on Little Saanich Mountain. Victoria was chosen from among all other cities in the Dominion of Canada as the one which possessed the best "seeing" atmosphere, freest from fog, and the most equable climate. The observatory which houses one of the two largest telescopes in the world, is reached by electric interurban or by motor. It is eight miles from the centre of the city, and a well-paved road winding through part of the beautiful Saanich Peninsula leads to the door. The observatory is open for visitors every day, and every Saturday evening, weather permitting, they have the privilege of observing celestial objects through the great telescope.

The climate of Victoria has often been compared with that of the south of England, but recent statistics give Victoria more hours of bright sunshine than even the far-famed summer resorts along the English Channel. From May to September is usually a period of small rainfall and bright skies, but the nights, even in midsummer, are invariably cool, and the heat of the day always tempered by the sea breezes. In describing the scenic beauties of Victoria and vicinity, it is difficult to find enough superlatives. Victoria itself has been called a "City of Trees." Airmen looking down from aloft tell us that Victoria has the appearance of a great garden. As the steamers reach this port, travellers are also impressed with this feature. Avenues of trees mark the city streets, and century-old oaks, wide-spreading maples, and tall poplars grace every garden. From April to May the gold of the Scotch broom colors, the hillsides, and all the year round, winter as well as summer, this is an evergreen city, for the laurel, the holly, the firs and the cedars do not change their color, and the grass only takes on a deeper tint. The scenic outlook from Victoria itself is unsurpassed. It is surrounded on three sides by the ever-changing tidal waters of the Pacific, and beyond them the green foothills and the towering snow-peaks of the Olympics.

On account of the equableness of the climate, there being no winter in the Eastern Canadian sense of the term, but only a rainy season with light frosts and rare snowfalls, Victoria and the country surrounding are admirably adapted to all kinds of agriculture, to fruit growing, stock and poultry raising. There is an ever-increasing demand from the Prairie cities for berries and small fruits grown in the orchards around Victoria.

Sportsmen and tourists generally find in Victoria the mecca of all their desires. It has been called the gateway to Canada's auto paradise, and the Island Highway certainly leads one through scenes so marvellously varied and lovely as to be beyond description. The Island is rich in game, and all of its lakes and streams contain trout of one kind or another, while the finest salmon on the North American continent is to be had at Campbell River.

The principal resorts reached by short trips by rail, auto or steamer are Oak Bay, Brentwood, Sooke Harbor Sidney, Shawnigan Lake, Duncan, Cowichan Bay, Cowichan Lake, Chemainus, Qualicum, Cameron Lake, Alberni, Great Central Lake and Campbell River. All of these can be reached within a day by automobile. At Oak Bay, at Brentwood, Colwood and Qualicum are to be found splendid golf links. There is a daily steamer service between Victoria and the islands of the gulf. This water trip is one of the most beautiful in Canada.

Victoria is the first and last port of call for all vessels to or from southern British Columbia and Puget ports by way of the Strait of Juan de Fuca. Its great and increasing importance in relation to trade development on the Pacific the Orient, and by way of the Panama Canal was recognized by the Dominion Government when they authorized the construction of the breakwater at Ogden Point. This has now been completed as well as two piers, freight sheds, electric crane and a car barge ferry slip at a cost of approximately $3,000,000. When the ferry slip on the Songhees Reserve is finished cars can be loaded at the outer docks and sent by continuous journey to any railway terminal on the continent. At present the car ferry Canora connecting with the C.N.R. makes a daily trip from Patricia Bay to Port Mann, linking up the Island with the mainland. The C.P.R. uses its Esquimalt car ferry slip for transferring cars from the Ogden Point ocean docks to its line.

Within the next few months it is expected that a start will be made on the new drydock at Esquimalt, a mile and a half from Victoria. The site has already been purchased by the Federal Government. This dock will be large enough to accommodate the largest vessels afloat.

The fact that there are tremendous areas of marketable timber, and coal, iron, copper and other mineral deposits in great quantity on Vancouver Island has become known to the world. The Pacific Ocean will be the scene of great commercial development within the next decades. There will be a demand for every commodity that Vancouver Island can produce especially in the line of timber and minerals. The awakening of the Orient means enormous Canadian trade expansion. Victoria is Canada's doorway on the Pacific Coast. This significant fact will not be overlooked. Already it is appreciated. The population of Victoria is growing rapidly. There is magnificent field here for the investor, the business man and the artisan.

the G.N. Ry. shops, 1 mile west of Grand Forks. See directory listings under Grand Forks.

West Summerland

a post office and town on the C.P.R., Kettle Valley line, 1 mile from Summerland on Okanagan Lake, and 7 miles west of Penticton, in South Okanagan Provincial Electoral District. It is the nearest town in Okanagan Valley to the coast, with daily train service, and owns its electric light, irrigation and domestic water plants. The fine telephone system is owned by a local company. It has Dom. Govt. and C.P.R. telegraph offices, daily steamer and express service, churches and consolidated schools. The rural municipality of Summerland comprises about 28 square miles, and is a large producer of soft fruits, vegetables and apples. The Experimental Farm is situated at the southern boundary. Mixed farming can be carried on successfully, and lumbering for box shooks. The climate is excellent; dry, clear and sunny. Population of the municipality, 1,800. Good fishing and shooting. See also Summerland. C. W. Lees, secretary Board of Trade.

WEST VANCOUVER MUNICIPALITY

located on the sunny side of English Bay, at the entrance to Burrard Inlet. West Vancouver Municipal ferries furnish direct transportation to and from the city of Vancouver. Other modes of transportation are the P.G.E. Ry. from North Vancouver, also by auto North Shore Marine Drive. The present terminus of the Pacific Highway ends at Caulfeild, a summer residential site unequalled for its beautiful flowers. West Vancouver has provided for pub-

lic schools. The Hollyburn school is capable of holding 160 children; the Dundarave school seating 80 pupils, modern in every respect. Marine Drive, the main artery of West Vancouver for road transportation, is built of asphaltic concrete and a favorite drive for motorists. Altmont Park is fitted to become a most popular and serviceable space. Telephone service, operated by the B. C. Telephone Co.; water system, all that could be desired, free from contamination, alkali and lime. Sport and recreation. Both trolling and rod; tennis, bowling on the green, mountain climbing and boating. Industries at present, lumbering, shingle mills and canneries. The municipality is most desirable for permanent homes and the most popular summer resort around Greater Vancouver. The southern slope causes early vegetation. For further information, write the Municipal Clerk for description and illustrated folder. The municipal council for the year 1919 are: Reeve, V. V. Vinson; councillors, A. H. Sherman, W. C. Thompson, H. R. McDonald and J. S. Yates; municipal clerk, James Allason.

WHITAKER & WHITAKER, West Vancouver Real Estate Specialists, 439 Richards St., Vancouver.

mer connects with several steamer lines running from Prince George to Quesnel, thus reducing the teaming haul to 32 miles. Has telegraph and telephone, and weekly express service. Population, 25 and up, according to working conditions. The Lightning Creek Gold Gravels & Drainage Co., Ltd., have a 20 mile lease of Lightning Creek, with headquarters at Wingdam. The last report of the Canadian Minister of Mines, says: "The company own extensive holdings along the lower part of this creek, for a distance of 20 miles. Extensive and systematic prospecting by keystone drilling to obtain cross-sections of the valley and the gold values has been carried on for a distance of about 2 miles along the stream. Both bench and deep channel gravels contain high values in coarse gold, the channel gravels being, however, much the richer." Address mail Wingdam, via Cottonwood PO.

ATKINS

STERLING  QUALITY

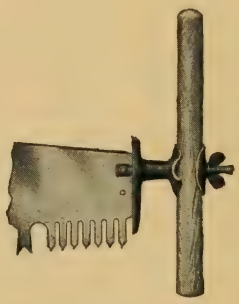
SAWS

are scientifically constructed from the best material, Sterling Quality Steel.

The great care used in the manufacture of Atkins STERLING QUALITY Saws assures you of greater production and more economical operation.

THE HANDLES

are like the Saws---distinctly ATKINS. We use only carefully selected hardwood stock, thoroughly dried and seasoned.



Write for Complete Catalogue

Send Us Your Saw Repairs

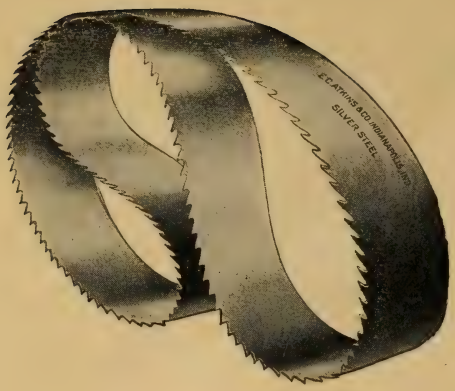
E. C. ATKINS & CO., Inc.

Established 1857

THE STERLING QUALITY SAW PEOPLE

Branch Carrying Complete Stocks:
VANCOUVER, B. C.

Factory:
Hamilton, Ontario



ATKINS

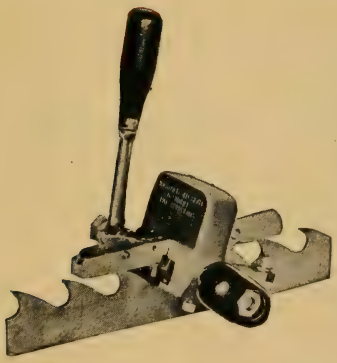
Sterling Quality

SAWS

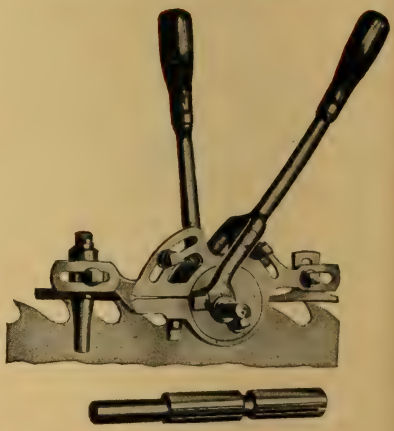
Will Do Your Work Well

Use Atkins Sterling Quality Saws and eliminate saw troubles. Profit by the service built into them, and accomplish more and better work. Their high quality means more money for you.

Atkins Pribnow Swages and Shapers



make perfect teeth. They increase your cut and decrease your cost. Built for heavy work.



E. C. ATKINS & CO., Inc.

Wrigley's Directory is produced entirely in British Columbia.

Wrigley's Directory is the index of all business activity in the province, from toy manufacturers to steel ship builders.

Wrigley's Directory is used as a standard reference work in the cities of British Columbia — Vancouver, Victoria, New Westminster, Kamloops, Nelson, Prince Rupert, Vernon, Cranbrook, Fernie, Revelstoke, etc.

Mr. Advertiser: Increase your up-country business by judicious use of advertising space in this directory.

CANADIAN STORAGE AND TRANSFER DIRECTORY

An Index of

Storage, Warehousing and Distributing

Facilities in Canada

STORAGE RATE GUIDE

Merchandise, Household Goods, Cold Storage, Cartage, Packing, Shipping and Distributing Rates.

Published annually, March 1st. $3.00. Used generally by wholesalers, manufacturers and shippers throughout Canada.

WRIGLEY DIRECTORIES, LIMITED

VANCOUVER, BRITISH COLUMBIA.

Mr. Advertiser

The B. C. Directory covers the entire field of British Columbia, and appeals to every manufacturer, business firm and profession in the province.

It has a bona fide circulation of 2,500 subscribers, and is referred to by thousands of others who are prospective buyers.

Your Advertisement

will reap the benefit of this unique publication at a very small outlay in cost.

Our Next Edition

We start the 1920 canvass about September. Reserve a part of your advertising appropriation for space in the only publication that thoroughly covers the province.
